REASONS FOR DECISION

It is the finding of the Board that the Applicant was able to meet the requirements of Section 5-B.2. to allow the requested Accessory In-Law Suite in the Residence R District. The Board finds that the in-law suite is in character with and follows the intent of the Residence R District. Accordingly, the Board has determined that the Special Permit requested is warranted.

FURTHER FINDINGS

Section 2: Administration, 2. Special Permits, B. Finding and Determination required that:

(1) Prior to granting a special permit, the SPGA shall make a finding and determination that the proposed use, building, structure, sign, parking facility or other activity which is the subject of the application for the special permit:

- (a) does and shall comply with such criteria or standards as shall be set forth in the section of this Bylaw which refers to the granting of the requested special permit;**

The Board finds that the proposed In-Law Suite complies with all of the criteria of Section 5-B.2 A & B as set forth below. Accordingly, the Board finds this condition satisfied.

- (b) shall not have vehicular and pedestrian traffic of a type and quantity so as to adversely affect the immediate neighborhood;**

The Board finds that the construction of the Accessory In-Law Suite will provide residential space to the applicant's mother which will not have vehicular or pedestrian traffic that will adversely affect the immediate neighborhood. As such, this criterion is satisfied.

- (c) shall not have a number of residents, employees, customers, or visitors, so as to adversely affect the immediate neighborhood;**

The Board finds that the proposed in-law suite should not be an adverse effect to the neighborhood, as the design of the proposed In-Law remains in character of the neighborhood, and is designed to keep its single-family nature. The proposed design includes a single door facing the street into an existing mud room which will have access to both the existing home and new in-law suite. Proposed secondary doors are designed to face the side yard in order to maintain the single-family character of the structure. The proposed undertaking is specifically intended to allow the Applicant and his family to remain in their home. The single-family home being residential in nature will have no employees or customers. Accordingly, the Board finds that there will not be any adverse effect on the neighborhood and this condition is satisfied.

- (d) shall comply with the dimensional requirements applicable to zoning district in which the premises is located, including, without limitation, the applicable lot coverage and buffer zone requirements in Section 5-G;**

The Board finds that as shown on the plans submitted with the Application, the single-family dwelling conforms to the dimensional requirements of the Zoning By-Law. As this house is a residential use, there is no buffer zone required. Therefore, the Board is satisfied that this condition is met.

- (e) shall not be dangerous to the immediate neighborhood of the premises through fire, explosion, emission of wastes, or other causes;**

The Board finds that the proposed in-law suite in the existing dwelling is residential in nature and there is nothing being used to cause any danger to the immediate neighborhood of the premises through fire, explosion, emissions of waste or other causes and this condition is satisfied.

- (f) shall not create such noise, vibration, dust, heat, smoke, fumes, odor, glare or other nuisance or serious hazard so as to adversely affect the immediate neighborhood;**

The Board finds that the proposed use is residential in nature. The proposed in-law suite conforms to requirements of the Zoning By-Law such that it would create such noise, vibration, dust, heat, smoke, fumes, odor, glare or other nuisance or serious hazard so as to adversely affect the immediate neighborhood. Therefore, this condition is satisfied.

(g) shall not adversely affect the character of the immediate neighborhood; and

The Board finds that the immediate neighborhood is residential in nature and the proposed undertaking is consistent with the area and immediate neighborhood. The architectural plans show the house is being renovated in a style that is consistent with the size and construction of the other houses in the neighborhood. As such, the proposed extension and alteration will not have an adverse effect to the character of the immediate neighborhood. Thus, this condition is satisfied.

(h) shall not be incompatible with the purpose of the zoning Bylaw or the purpose of the zoning district in which the premises is located.

The Board finds that the purpose of the Zoning Bylaw in part states, "to encourage housing for persons of all income levels..." "to encourage the most appropriate use of the land". The proposed in-law suite in the existing house will allow the owners to remain in their home, which is consistent with the purpose of the Bylaw. As such, this use, conditioned appropriately, is entirely compatible with the purpose of the Zoning Bylaw and this condition is satisfied.

Additionally, the necessary Findings and Determinations noted in Section 5-B.2. B. & C. of the Zoning Bylaw have been satisfied and addressed through this Decision and the conditions.

Said Special Permit is granted pursuant to Massachusetts General Law c. 40A § 9 which provides in pertinent part as follows: "...Zoning ordinances or by-laws shall provide that a special permit granted under this section shall lapse within a specified period of time, not more than two years, which shall not include such time required to pursue or await the determination of an appeal referred to in section seventeen, from the grant thereof, if a substantial use thereof has not sooner commenced except for good cause or, in the case of permit for construction, if construction has not begun by such date except for good cause."
